ONEshade & OliBULK Fill
COMPOSITE RECONSTRUCTION COUPLE

a perfect match…

ONEshade and **OliBULK Fill**
are a perfect match for 80%

of I and II class restorations and most III and V class cases!

Unique composition of these composites creates an easy and fast solution for the most common cavities. Time consuming colour and opacity matching is no longer an issue. With this perfect pair you can easily prepare highly durable restorations with no compromises to esthetics.

All you need are these two syringes.

ONEshade
universal shade with exquisite
colour adaptation effect
in a condensable consistency

OliBULK Fill
flowable material
for bulk-fill technique
with up to 4 mm single layer

Best recommended indications

	I class	II class	III class	V class *
ONEshade	●● ●◐	●◐	●● ●◐	●● ●◐
OliBULK Fill	●● ◐●	●◐	●◐	◐●

● **OR** ● ONEshade **OR** OliBULK Fill (each composite separately)

◐● ONEshade **AND** OliBULK Fill (both composites together)

* for the V class maximum ONEshade layer is 0,5mm

fast and reliable
procedure

Both ONEshade and OliBULK Fill can be used according to universal simple procedures. Additionally, they guarantee easy application, quick polishing and long-lasting results. They also allow you to save a lot of time at the chair. Do you need anything else? Coffee maybe :)

Bestsellers
invisible fusion with
chameleon effect

Another common advantage of both composites is the chameleon effect, but what makes them different is the opacity. Opaque OliBULK Fill works as a base layer for deep and irregular cavities creating a background. Much more transparent ONEshade, with its Colour Adaptive Technology, gives an invisible fusion to all surrounding tissues.
Universal colours of ONEshade & OliBULK Fill match most natural tooth shades.

oustanding
mechanical properties

Independent German Institutes have confirmed the high quality of both materials. The values of the two most important mechanical parameters qualify these composites for their intended use. The flowable OliBULK Fill with its low shrinkage stress and the universal ONEshade with its high compressive strength guarantee a reliable result for most common cavities.
